Secure Network Systems, LLC (SNS) Enters SBA 8(a) Program

SNS's Innovative Cybersecurity Solutions Expands It's Presence in Federal Agencies

Boulder, CO - August 4, 2009 -Secure Network Systems, LLC (SNS), a leading provider of IT/Network and converged physical security systems, has been chosen to participate in the Small Business Administration (SBA) 8(a) Small Business Development Program. The program facilitates a streamlined contract vehicle for government customers including direct sourcing of up to \$5MM projects and access to special opportunities, as well as working with the SBA team to develop and grow the business. Additionally, large government bids often encourage prime contractors to work with small businesses, making 8(a) companies more attractive to large contractors as partners.

"SNS is looking forward to offering risk-appropriate security solutions based on Best Practices while maintaining privacy", said Betty Pierce, President of SNS. "Our team anticipates that we can continue to provide cost-effective certified products and qualified services to a diverse blend of end users, and also contribute back to every community where we are involved."

While many 8(a) companies are relatively young, SNS has been in business for almost a decade and has earned the trust of over 200 satisfied customers spanning both the private and public sectors, concentrating in critical infrastructures. SNS has a number of products on the FIPS 201 Approved Product List, is GSA-certified as an HSPD-12 Complete End-to-end Solution Provider, and was most recently selected to successfully provide an identity verification solution for a Transportation Safety Administration pilot maritime port. In addition, the principals are the inventors and manufacturers of a suite of internationally patent-pending solutions.

About Secure Network Systems

Secure Network Systems is an emerging leader in the converged IT/network and physical security market with a strong background in solving difficult problems and delivering world-class solutions. SNS has distinguished itself through delivery of innovative results that encompass people, processes, and technologies, improving the overall security posture. SNS employees are dedicated to developing products and providing services that help protect and defend the American way of life.
